HYDRAULIC QUICK COUPLING

Company Profile

Fescolo pneumatic Co., Ltd. , found in 2001, which specializes in pneumatic products such as air cylinders, solenoid valves, pneumatic control valves, filter regulators, air hose, fittings and so on. We have an excellent technical research department, first-class production technology and equipments. All our workshops are in accordance with 6S principles. At present, we have 18 production lines, more than 2,000 production equipments, annual turnover of more than 20 million US dollars.

Until now, our customers are more than 80 countries around the world. Our major products include air cylinders, solenoid valves, pneumatic control valves, filter regulators, air hoses and fittings. The applications involve industrial automation, medical treatment, sanitary ware, automobile manufacturing, wire and cable, horticulture and agricultural irrigation etc. Furthermore, we accept ODM and OEM customization services, and can design logo and label for our customers.

Our chief technical engineer, Antonio Bonifazi from Italy, had worked as a technical engineer in Aigiro Group and NSG Group for many years. He has fruitful experience and unique technology in mechanical automation industry. Each product from Fescolo will go through 3 inspections at least before shipping, in order to guarantee every product you receive is perfect. The raw materials we use are the best and latest, never recycled or old materials. Basically, all our molds are developed and designed by ourselves, which ensures the stability of product quality. At present, 70% workshops realize automatic production, which greatly increases the production capacity. Compared with last year, the annual production capacity has increased by more than 50%. In addition, there are a large number of workblanks and semi-finished products available in stock. From order confirmation to delivery, usually it takes only 3~10 working days. We have stable freight forwarders by sea, air and train, so that we can deliver the goods to our customers with the best price and service.

Most of our products includes a one-year or 6-month warranty. Many replacement parts are available in stocked they can be shipped within 3days. Our technical sales team experienced and reliable can provide best services from pre-sales to after-sale, as well as technical support and consultancy. We are on a mission to create a green and healthy production environment for our employees, to provide our customers with professional and efficient services, energy-saving and stable quality products.

Warmly welcome and opening up the boundaries of our communication. Sincerely, we are looking forward to your cooperation in the near future. FESCOLO, your trusted partner forever.

FK-A1

CLOSE TYPE HYDRAULIC QUICK COUPLING (ISO7241-1A)

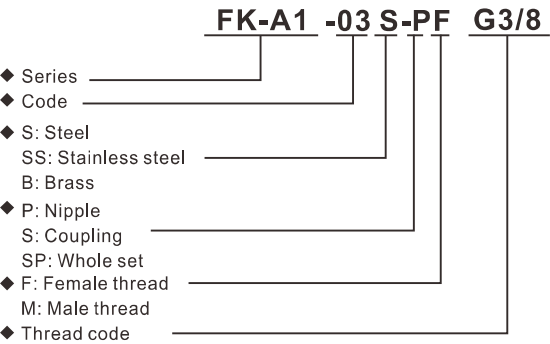

Body Material	Carbon steel (trivalent chromium)
	Stainless steel (natural color)
	Brass (natural color)

Applications

The FK-A1 Series brings to the industry a proven design for use on construction equipment, forestry equipment, oil tools, Oil equipment, steel mill machinery, and other demanding hydraulic applications.

Features

FK-A1 Series couplings feature:

- Poppet valves available to prevent uncoupled leakage.
- Poppet valves open automatically when coupled, within rated working pressure, to keep the flow expeditely.
- Critical parts are hardened for durability.
- Dependable ball-locking mechanism holds the mating halves together.
- Socket and plug are precision machined from solid bar stock.
- FK-A1 Series conforms to the standard of I SO7241-1A.
- Compatible with PARKER 6600 Series, FASTER ANV Series, AEROQUIP 5600 Series and HANSEN HA 15000 Series.

Features

FK-A3 Series couplings feature:

- New valve design, it can resistance damage from high flow and the pressure of impulse that providing advanced performance.
- Poppet valves available to prevent uncoupled leakage.
- Poppet valves open automatically when coupled, within rated working pressure, to keep the flow expeditely.
- Critical parts are hardened for durability.
- Dependable ball-locking mechanism holds the mating halves together.

Applications

FK-B1 couplings, are used across the spectrum of hydraulic applications. These Double Shut-Off couplings can be found anywhere that fluid transfer lines need to be connected and disconnected for operation or maintenance of equipment, and a loss of fluid is undesirable. The FK-B1 Series brings to the industry a proven design for use on construction equipment, forestry equipment, oil tools Oil equipment, steel mill machinery, and other demanding hydraulic applications.

KZF

CLOSE TYPE PNEUMATIC AND HYDRAULIC QUICK COUPLING
(ISO7241-1B) STAINLESS STEEL304

Socket with valve Plug with valve

Body
Material

Stainless steel
(natural color)

Applications

KZFcouplings, are used across the spectrum of hydraulic applications. These Double Shut-Off couplings can be found anywhere that fluid transfer lines need to be connected and disconnected for operation or maintenance of equipment, and a loss of fluid is undesirable. KZF couplings primarily used with hydraulic fluid, are also used with chemicals, water, steam and some gases.

Part Number:

KZF- 03 -P F G3/8

- ◆ Series
- ◆ Code
- ◆ P: Nipple
- S: Coupling
- SP: Whole set
- ◆ F: Female thread
- M: Male thread
- ◆ Thread code

Features

KZF Series couplings feature :

- Poppet valves available to prevent uncoupled leakage.
- Poppet valves open automatically when coupled, within rated working pressure, to keep the flow expedately.
- Dependable ball-locking mechanism holds the mating halves together.
- Socket and plug are precision machined from solid bar stock.
- KZF Series conforms to the standard of ISO7241-1B.
- Compatible with PARKER 60 Series, FASTER HNV Series, AEROQUIP FD45 Series and HANSEN HK Series.

Performance
Test Fluid:oil-200SUS

FK-C1

BALL VALVES TYPE HYDRAULIC QUICK COUPLING (ISO5675)

Socket with valve Plug with valve

Body Material	Carbon steel (trivalent chromium)
	Stainless steel (natural color)
	Brass (natural color)

Applications

The FK-C1 Series brings to the industry a proven design for use on construction equipment, forestry equipment, oil tools, steel mill machinery, and other demanding hydraulic applications.

Part Number:

Features

FK-C1 Series couplings feature:

- Poppet valves available to prevent uncoupled leakage.
- Poppet valves open automatically when coupled, within rated working pressure, to keep the flow expeditely.
- Hard, chrome alloy balls are used for valving. It be loaded on the valve seat by the springs.
- The valve provides a metal-to-metal seal between the ball and coined seat.
- Critical parts are hardened for durability.
- Dependable ball-locking mechanism holds the mating halves together.
- Socket and plug are precision machined from solid bar stock.
- FK-C1 Series conforms to the standard of ISO5675.
- Compatible with PARKER 4000 Series, FASTER NV/NS Series.

FK-CT

PUSH AND PULL TYPE HYDRAULIC QUICK COUPLING (ISO5675) STEEL

Socket with valve Plug with valve

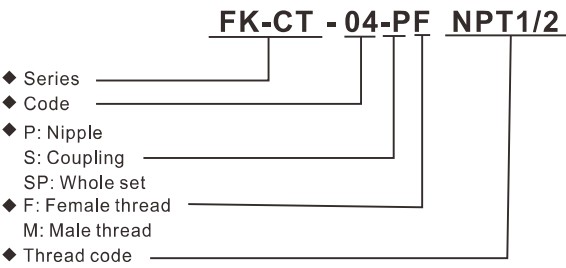

Body Material	Carbon steel (trivalent chromium)
---------------	--------------------------------------

Applications

The FK-CT Series brings to the industry a proven design for use on construction equipment, forestry equipment, agricultural machinery, and oil tools.

Part Number:

Features

FK-CT Series couplings feature:

- Double acting sleeve for one handed push-to-connect operation when coupler is clamp or bulkhead mounted.
- Poppet valves available to prevent uncoupled leakage.
- Poppet valves open automatically when coupled. Within rated working pressure, to keep the flow expedite.
- Critical parts are hardened for durability.
- Dependable ball-locking mechanism holds the mating halves together.
- Socket and plug are precision machined from solid bar stock.
- The series conforms to the standard of ISO5675.
- Compatible with PARKER 4250 Series, FASTER CPV-CNV Series.
